

The Greatest Discovery of the Age--All Diseases Caused by Microbes!

—AND—

# RADAM'S MICROBE KILLER

Positively Kills all Microbes in the Human System.

## POSITIVELY CURES

Asthma,  
Bronchitis,  
Consumption,  
Cancer,  
Catarrh,  
Chills and Fever,

Diphtheria,  
Dyspepsia,  
Dropsy,  
Dysentery,  
Diarrhoea,  
Eczema, Leprosy,

## POSITIVELY CURES

Indigestion,  
Malarial Fever,  
Kidney Disease,  
Paralysis,  
Rheumatism,  
Ringworm, Tumor,

Scrofula,  
Syphilis,  
Scarlet Fever,  
Small Pox,  
Sick Headache,  
All Female Troubles.

## WORDS OF WARNING---BEWARE OF FRAUDULENT IMITATIONS!

The success of Radam's Microbe Killer has brought out many worthless imitations. Some of them are positively injurious, and we give this warning that the public may not be deceived.

SEE THAT EVERY JUG HAS OUR TRADE MARK ON IT; SAME AS ABOVE CUT. PRICE \$3 PER GALLON.

### Cause of Disease as Given by the Scientific Men of the Age.

Monsieur Pasteur, who for years has made them a special study, first discovered that these minute insects were the cause of spreading the most deadly contagions through their astonishing rapidity of reproduction. Pasteur discovered them in myriads in human blood, in sheep, rabbits and rats. He found that the Microbe was the direct cause of the Variolosis, or small-pox—Bronchitis, Yellow Fever, and other contagious diseases.

The microbe, in the human system attacked by Variolosis, is thread-like, cylindrical and somewhat swelled. It is the smallest of all powerfully magnified animal organisms. It breeds by the thousand per minute. Pasteur, after making a close study of microbes, discovered that the quickest way to exterminate them was by the free inhalation of oxygen gas, or by liquids charged with that gas, but admits that the time must come when some powerful liquid will be discovered that will effectually destroy the microbe, and that the liquid must contain such gaseous combinations as will directly destroy in the human body those germs or microbes of disease.

Dr. MacLagan, a prominent member of the Royal College of Physicians and Surgeons, says: "The idea that many of the diseases to which man and lower animals are subject, result from the presence in the system of minute organisms or microbes, is not a new one."

The introduction of the microscope, the discovery of the yeast plant, and the further parasitic nature of many cutaneous diseases have proved conclusively that it is directly attributable to the germ or microbe theory of disease.

The theory has positively proved that many diseases are due to the presence and propagation in the system of minute living organisms. It is essential, therefore, to become thoroughly acquainted with the class, kind, very competence of the germs that produce what is now termed the phenomena of disease.

Contagion, infection, is created by absolute experience and scientific experiments and proofs, by the existence of minute organism or microbes. The contagion, or microbe being particulate, and the minute particles being irregularly scattered about in the atmosphere, it is evident that the inhalation of one or more of these particles is purely a matter of chance. Yet, such inhalation, no matter how healthy and strong the man or animal thus inhaling it, will, as a matter of course, be stricken down sooner or later, by the myriads of microbes that will, according to the contagious poisonous matter inhaled, breed into his system. To exterminate these it has been found that liquids strongly impregnated with gases and alkali have been the most efficacious, and it is but a matter of time when liquid strongly impregnated with those substances will be discovered that will effectually destroy the microbes or germs of disease.

It is an organic form of such extreme minuteness as to be classified under the head of Micrococci. The Microbe is a spheroidal, transparent and of a gelatinous consistence. It enters the human system by inhalation, or exists in the water or milk we drink, or the food we eat. It is able to stand the greatest amount of heat. By the most careful study and frequent experiments, microbes have been induced, by ivory needles, into

meats that have been thoroughly roasted and boiled, and yet, when taken from the ovens, pans, grid-irons or pots, the microbes have been found to be yet alive and propagating, thus showing that even cooking has no effect upon them.

Professor Tyndall says of the Microbe: They are found in myriads and countless shape, floating in the air, destroying man as well as beast and vegetation. The virtual triumph of the aseptic system of surgery is based on the recognition of lying contagia or microbes, as the agent of putrefaction, and this discovery made, it behooves the closest study of the subject by the physician, surgeon, chemist, agriculturist, in fact by all men, to endeavor to discover vaccines substances that will penetrate through every tissue of the human, animal or vegetable system and effectually destroy that death dealing pest, the Microbe.

The word microbe was first introduced by Professor Charles Sedillot, and endorsed by the great philosopher, Littré, who caused its adoption by the Académie des Sciences of France, and thus had it admitted as a scientific term to be used by all scientists.

Science has taught us that the direct causes of contagious diseases are directly attributable to a minute, invisible, yet death-dealing insect, feeding, living on the germs of corruption inhaled, absorbed in the system, whether human, animal or vegetable.

It is designated in science as the microbe, the most deadly of all animalcules, propagating by millions, and spreading disease wherever it makes its appearance. The extermination of that curse to the human race has taxed the ablest scientists, who have devoted hours of study in each and every branch of their different researches to check the frightful inroads by the microbe upon whatever it attacks.

William Radam, a florist and botanist of Austin, Tex., who, from his earliest boyhood, had been brought up to take care of and watch to destroy over the plants, seedlings and slips, that were extensively grown in his father's world-famed nurseries, having frequently seen many of his favorite plants suddenly droop and die, was the first to make the Microbe his special study, and its extermination the object of his life.

Fortunately for William Radam, he was able to command the means that enabled him to purchase the instruments needed to perfect his experiments, as he patiently advanced in his studies of the microbe. He was not the man to rely merely on book learning, although he closely studied the theories advanced by scientists.

William Radam, after years of patient study and analysis, found the true origin of the germs of disease, and by a secret inspired by Nature's close study, was able to produce what will be read below as that exterminator of the dreadful scourge, microbe—as recommended by the greatest authorities, and world-famed authorities, on the subject who all admit that to exterminate that pest and scourge requires such a liquid saturated with gases, as William Radam's Microbe Killer.

### TESTIMONIALS

Now read the testimonials and convince yourself if they are genuine or not. Please investigate. I will forfeit \$1,000 if you find any of our testimonials not genuine. We give full address,

so that you can write to any of them. Do not forget to inclose a stamp, and you will certainly receive an answer. We have a great many other testimonials in our office, and have the consent to show them to the afflicted, but have no authority to publish them. From the following testimony you can see at a glance that this medicine cures every disease:

### Consumption.

PARADISE, May 13, 1889.

Microbe Killer Co.: I can recommend Radam's Microbe Killer for the cure of consumption. I have been sick four years, I have employed the best physicians in San Francisco, San Jose, Los Angeles, and am now taking my fifth jug of William Radam's Microbe Killer. I have gained fourteen pounds in three months, and I note a steady improvement. The medicine has accomplished more for me in the short time I have tried it than all the doctors and the outlay of \$7,000, and I hope all my friends who are afflicted in the way I was will use it.

J. P. BENOULT, Formerly of San Francisco, now a resident of Pasadena.

### Complicated Diseases

SACRAMENTO, April 3, 1889.

William Radam's Microbe Killer Co.: Gentlemen—I take pleasure in adding my testimonial to that of others who have been cured by the virtue of your medicine. I have been afflicted for several years, and for the last three or four years have not been able to work, having been confined to my bed a good deal of the time. My system was so thoroughly poisoned from exposure over thirty years' standing, in connection with the alarming symptoms of malaria and diseased liver, that life was a burden. As a result the liver, kidney, urinary organs, heart, bronchial tubes, and lungs, were all involved, causing dyspepsia, neuralgia and rheumatism, with many alarming and describable symptoms. Have been under the care of physicians and medicines of the day and bolts, batteries, and baths, without avail, and had almost given up hope of relief. But one of God's good and perfect gifts to man (through the instrumentality of man) was made known to me by a letter to my wife from her father, a man of 76, in Albany, Mo., stating that William Radam's Microbe Killer was curing all diseases, given up by physicians and advising me to use it and not give up until a cure was effected. Coming from the source I did I at once ordered two gallons expressed from St. Louis, Mo., costing me \$3 per gallon, but the cheapest medicine I ever took. Commenced taking it in December last. Have taken seven gallons and have been improving slowly, but surely. Have now gained my usual weight and feel better than for years. Am over 60 years of age. No money would induce me to be without it in my family. I hear many good reports from those who are now using it.

Yours respectfully, L. L. GODDARD.

### Dyspepsia.

LYNCHBURG, Texas.

Messrs. Wallace, O'Leary & Co., Agents Radam's Microbe Killer, Houston, Texas:

My suffering from dyspepsia and biliary fever made my life a misery, and at times I was so despondent as to care little to live, when I heard of your great medicine, and purchased a gallon. It gives me pleasure to inform you that before half a gallon had been used, \$1,000 could not have bought the remainder of the gallon had I not known where to get more.

Yours truly, CAPT. GEO. L. SMITH.

### Dysentery.

GALVESTON, TEXAS, March 10, 1888.

A. Behresds, Agent for William Radam's Microbe Killer.

Dear Sir—I have been suffering with a complication of diseases which originated from a diseased liver. I had dysentery, bloody flux and internal tumors. I consulted some of the most eminent physicians in the city and used their medicines for a long time without getting any relief. I was finally given up to die, when a friend advised me to try the Microbe Killer. As a last resort I gave it a trial, and the relief that it gave was wonderful. When I commenced to take Microbe Killer I weighed only eighty-six pounds; my present weight is 140 pounds, and I am restored to my usual good health.

JOHN W. DERRICK.

Sworn to and subscribed before me this 10th day of March, A. D. 1888.

JOHN A. CAPEN, Notary Public, Galveston county, Texas.

SAN MARCOS, Tex., Sept. 17, 1887.

Mr. William Radam: Dear Sir—The Microbe Killer, I find, is a splendid thing. Can I get an agency here? My little boy that was affected with worms is cured, and getting fat and rosy. My father is also using your medicine, and is improving very fast.

Very respectfully, MRS. ALICE LEE.

### Catarrh

DEAF AND DUMB INSTITUTE, AUSTIN, TEXAS,

July 11, 1888.

Mr. William Radam:

Dear Sir—I certify that I have been a great sufferer with pains in my chest, catarrh in the head, and headache for years. I have spent hundreds of dollars in traveling in Colorado, Utah, California, Oregon, Montana, Wyoming and Minnesota, and found no relief. I heard of Radam's Microbe Killer. I have used four gallons of your medicine, and I am almost entirely well. My headache and catarrh are gone. I am still using the medicine. I will send another gallon to my brother.

W. H. LACY, Superintendent.

### Malarial Fever.

HOUSTON, TEX., October 9, 1888.

Messrs. Wallace, O'Leary & Co., Agents William Radam's Microbe Killer: Gentlemen—I have been using the Microbe Killer for malarial fever and general debility, and write you to certify that I am again strong and healthy, and am satisfied the Microbe Killer is a sure remedy for these diseases.

B. E. LEWIS, Proprietor Capital Stables.

### Asthma and Bronchitis.

NASHVILLE, Tenn.

I have been a sufferer from asthma, catarrh and bronchitis for nearly twenty years. I have tried the best physicians and remedies without any relief, and now, since I have been taking Microbe Killer, I am entirely cured and can recommend it to all.

M. HERNSTEIN, J. P., Nashville, Tenn.

To Whom it May Concern—This is to certify that after taking one jug of Microbe Killer I was permanently cured of a severe attack of bronchitis and pulmonary inflammation, said illness having resisted all methods of medical treatment.

I cheerfully recommend William Radam's Microbe Killer as being more than is claimed for it.

HENRY V. MIELLY, With Rice, Born & Co., 77 Camp street, New Orleans, February 27, 1887.

### Leprosy.

The only case of leprosy ever known to have been cured by any medicine, James Kavanaugh, Jr., is now entirely recovered and is back in New Orleans. We are treating five other cases of Leprosy, all success fully.

Fifth District, New Orleans, July 23, 1889.—To whom it may concern: I positively assert that my son was afflicted with that most hideous of diseases, Leprosy, and of a character most malignant. Any persons who may be skeptical regarding this case are most cordially invited to call and see him now, or at an early date, at my residence, No. 157 Eliza street, Algiers, Fifth District of New Orleans, because if not seen and he continues to improve, as he has since beginning the use of William Radam's Microbe Killer, they will not have an opportunity of giving an honest verdict concerning the case. Respectfully,

JAMES KAVANAUGH.

Algiers, Fifth District of New Orleans, July 24, 1889.—I, the undersigned, do hereby declare that I have been afflicted with leprosy for over four years. My sickness has been declared leprosy by the leading physicians and the public generally, being entirely abandoned as a lost case to die; but thanks to Mr. Radam, whose medicine, or Microbe Killer I have been using for five weeks with the most beneficial results. I am satisfied that by continuing his great and most wonderful remedy a few months longer I shall again be able to set to work and support my poor aged father, upon whom I have been a drawback in his declining years.

JAMES KAVANAUGH, JR.

### Heart Disease

Radam's Microbe Killer Co.:

Gentlemen—My son, fourteen years old, was cured with less than one gallon of Radam's Microbe Killer, after being given up by physicians as incurable with enlargement of the heart. My wife was also cured of a severe bronchial trouble after a failure on the part of physicians to relieve her.

I consider it far superior to all known remedies.

B. B. KIRKPATRICK, Sacramento, Cal., April 27, 1889.

### Rheumatism.

November 14, 1889.

The Wm. Radam Microbe Killer Co.: Gentlemen—Having tried every suggested remedy for chronic rheumatism for more than ten years, I was dubious as to the efficacy of your Microbe Killer, but am frank to admit that a cure (and I earnestly trust a permanent one) was the result after having taken not quite the entire jug you sent me according to directions. Accept my thanks. I am dear sir, respectfully yours.

FRANCIS P. DOOLY, Knoxville, Tenn.

NEW YORK, September 25, 1888.

William Radam's Microbe Killer Co.: Gentlemen—In reply to your inquiry as to the effect that Microbe Killer had on me, I would say that if it cost me \$100 per gallon I would not be without it. I took it three weeks and am now clear of all pains and aches. I suffered for the past ten years with muscular rheumatism, and it has been so bad at times as to prevent my attending to business. Very truly yours,

JOHN BLAKELEY, 233 Broadway, N. Y.

### Kidney Troubles

PHILADELPHIA, March 30, 1889.

S. E. corner Fourth and Market streets.

William Radam:

Dear Sir—I have had kidney troubles for three years, accompanied with pains and aching across my back and hips. Suffered very much at times, at night I had pains across the lower part of my abdomen; had considerable inflammation at the neck of the bladder. In general, it almost broke me up. I could get no relief from anything I had taken until I commenced with your Microbe Killer. I feel now like a new person. I will further explain my case to any one writing me. Would advise any one with any disease of the kidneys to use the Microbe Killer.

ELWOOD PRICKETT.

### Piles.

ST. LOUIS, Mo., May 15, 1889.

By using Radam's Microbe Killer I have been cured of piles of many years' standing.

JOHN LUTHELM, Room 3, Opera House Building.

Other testimonials furnished on application.

Since the success of Radam's Microbe Killer has been proven, no less than fourteen spurious imitations have been placed on the market, the proprietors of which expect to the sell same on the reputation of Radam's Microbe Killer. They are called by various and sundry names, such as "GERMICIDE," "GERMETEUR GERM EXTERMINATOR," "ELECTRO GERMICIDE," "MICROCIDE," "MICRO," and various other names. They are self-made counterfeits, and it is hoped the public will not be deceived by them. These are the usual attempts to defraud the people by imitating a successful and meritorious article. We warn the public against all such.
